**Millennium<sup>TM</sup>  
World School**  
Experience · Succeed · Lead

Each symbol in our badge is a commitment that we have for our learners:

To sharpen the skills of our students while nurturing their innate talent

To ensure that our students become global citizens and leaders

To build and provide innovative learning tools to ensure that our students become lifelong learners

To encourage our students to imbibe an attitude and spirit of justice and peace

**Outcome of our students:**

**AD ASPERA PER ASTRA** is a Latin phrase that means: "Over rough paths to the stars"  
At Millennium World School our students will be able to aim for the stars in spite of any challenges they may face.

**AND OUR  
CHILDREN  
WILL SHAPE IT.**

India is at the forefront of the global revolution. Committed to this purpose, is Millennium World School. It understands the unique learning potential of every child and has geared its Millennium Learning System™ to provide the students with a better understanding of life and its subjects so that they prepare today, for their greater role tomorrow...in shaping the India's Millennium.

# THINKING FOR TOMORROW

Change does not come about in a day. It needs careful preparation. Millennium Education Management has the expertise and vast experience in understanding how to unlock the unique learning ability and potential inherent in each child. The result of this expertise is the Millennium Learning System™ (MLS). An intuitive, seamless and scientific way of teaching and learning that is changing the way children learn across India, everyday. Every step a child takes with the Millennium Learning System™, is a step towards a confident exploration of her/his potential. It unleashes immense possibilities so that the child is ready to take on her/his future role in defining the Indian Millennium.

The Millennium Learning System™ identifies the specific skill set of every child and helps each one of them to derive inspiration from within as well as motivation from the outside world. To prepare our children to take charge of tomorrow, the Millennium Learning System™ focuses on their intellectual, creative, physical, mental, emotional and social abilities; in the process, creating lifelong learners who will be the leaders of tomorrow.

# PREPARING THE CHANGE

Success needs preparation and a well thought out roadmap. The Millennium Learning System™ is the friend, philosopher and guide that helps map your child's academic and intellectual growth curve through the most critical years of her/his life.

Utilizing four distinctive learning stages, the Millennium Learning System™ makes learning intuitive, accessible and enjoyable through its scientific and well structured pedagogy and philosophy which translates at different stages of a child's life through the curriculum; innovative textbooks, unique dictionary, project and apprentice manuals, Smartclass™ technology and skill-based assessments. The well-trained teachers are instrumental in taking this forward. This is part of a well-researched and integrated approach to help our children progressively achieve confidence in their abilities and believe that what they think today will change their tomorrow.

## **MLS, LEVEL ONE (LITTLE MILLENNIUM) - 2 TO 4 YEARS**

MLS believes in laying the foundation of learning early in life. It applies a unique 'Roots' approach as a part of its initiative, 'Little Millennium'. While the Little Millennium's environment nurtures a feeling of love and protection in the child, it also develops in the child the basic foundational skills through an eclectic pedagogy.

## **MLS, LEVEL TWO - 5 TO 9 YEARS**

As a child begins to ask questions, the Millennium Learning System™ equips her/him with the right resources to seek answers from. During this stage, 'learning-by-doing' and project-based approaches are applied, allowing your child to absorb knowledge, experiment and practice.

## **MLS, LEVEL THREE - 10 TO 12 YEARS**

On the threshold of teenage years, she/he is taught to apply problem-solving skills to real life situations. Throughout this stage, the children are exposed to over 300 vocations and provided expert guidance on each. During this stage the MLS lays the foundation for a child to map her/his aptitude, personality and interest that will help her/him to plan its future role as a leader and influencer in society.

## **MLS, LEVEL FOUR - 13 TO 16 YEARS**

Generally the teen years are considered to be a difficult period for a teenager and most decisions are formed unconsciously at this stage. How a teen faces the challenges of the world is framed at this period, hence the MLS provides an in-depth knowledge of concepts and helps map her/his strengths to vocations gathered through scientifically designed assessments. A mind mapping pedagogy at this stage encourages independent thinking that helps these teenagers make the right choices now and as adults later in life.

Learning does not take place in isolation and the Millennium Learning System™ understands this. For this reason, it creates opportunities for real life experiences through its workplace connect programme, internships and career fairs. It also involves parents at every stage, making them equal partners in the child's progress. Thus, the MLS, step by step helps the child evolve into a confident, responsible individual, ready to take charge of tomorrow.

# AFFECTING THE CHANGE

Beyond mere education, Millennium World School believes in tapping into, and realizing, a child's inherent talent across a spectrum of abilities. Various activities included in the Millennium Learning System™ help the students discover their preferences and go a long way in defining their true personalities.

Children are geared to become lifelong learners, who can adapt themselves to meet the challenges of life. The students are endowed with the capabilities needed to become future leaders in the fields of business, technology, administration and others. Moreover, Millennium World School considers it vital to instill in them, a strong set of core values that will not only define their today but also help shape their, and India's, tomorrow.

## CREATIVE ARTS

Art & Craft  
Origami  
Painting  
Photography  
Gardening  
Creative Writing  
Calligraphy  
Candle Making

## PERFORMING ARTS

Music - Vocal, Instrumental  
Theatre  
Elocution - Debating  
Dance - Indian Classical,  
Folk, Western

## SPORTS

Cricket  
Volleyball  
Chess  
Football  
Badminton  
Adventure Sport

## OTHERS

Social Work  
Cooking  
Environment Awareness  
Astronomy  
Robotics
